OFFERING HOPE FOR PATIENTS AND HELP FOR FAMILIES
The inability to pay for essential medical care is not just a significant problem for the uninsured, but also for people who have health insurance. Rising deductibles, premiums and co-insurance prevent many people from being able to afford the treatment they need.

The Patient Access Network (PAN) Foundation is dedicated to helping federally and commercially insured patients with their out-of-pocket expenses for prescribed medications. Partnering with generous donors, providers and pharmacies, PAN provides the underinsured population access to the healthcare treatments they need to improve the quality of their lives.

PAN Foundation Facts

- PAN uses approximately 95 cents of every dollar to directly help patients.
- PAN has helped approximately 450,000 people living with critical or chronic illnesses, awarding nearly $1 billion in financial assistance, through over 50 disease-specific programs.
- PAN’s state-of-the-art actuarial reserve model maximizes the distribution of donated dollars, allowing as many people as possible to access the critical medications they need.
- PAN’s streamlined patient application process and online portals make it convenient for patients to apply for financial assistance.
- Grants cover co-payments, deductibles, co-insurance and – for certain diseases – insurance premiums and travel expenses.

Our Mission
PAN offers help and hope to people with chronic or life-threatening illnesses for whom cost limits access to critical medical treatments.

PAN Foundation Provider & Pharmacy Partnerships

PAN partners with pharmacies and medical providers of all sizes and scopes, throughout the country. Pharmacies and providers can submit applications on behalf of their patients through PAN’s online portal, which features:

- Enrollment capability 24 hours a day, seven days a week
- Instant determinations
- Real-time patient status, claims, billing and account data tracking capabilities
